

BPwin to Arena Link UDP Documentation, Library, and Samples:

IDEF3 to ArenaBE Mappings.doc describes the use of the UDPs in BPwin.

For Arena 5.0:

The UDP library for Arena export, **ArenaBEUDPs-5.bp1**, should be merged into any model which is to be used as a source for an Arena 5.0 model.

The sample models are:

NC Vehicle Inspection.bp1:

Diagram “**Vehicle Inspection Certification Process**” uses non-standard shapes. This diagram may be exported to Arena 5.0. When run in Arena, it will reveal problems with the process. This is a legitimate result.

Diagram “**Award New Inspection Certification Sticker**” may be exported to Arena 5.0.

ACME Medical Equipment 41-5.bp1:

This model contains two versions of a single decomposition diagram. These diagrams illustrate the definition and use (instances on named grey dashed arrows) of resources.

Diagram “**ACME Medical Equipment**” is in IDEF3 notation.

IDEF3 alternate diagram, “**ACME Medical Equipt.**” uses non-standard shapes.

Either diagram may be exported to Arena (via File|Export|Arena).

ArenaOrderEntry41-5.bp1:

Diagram “**Credit Verification**” uses non-standard shapes that emulate those in Arena.

IDEF3 alternate diagram, “**WORST CASE CREDIT**” is the same diagram in IDEF3 notation.

Either diagram may be exported to Arena (via File|Export|Arena).

For Arena 4.0:

The UDP library for Arena export, **ArenaBEUDPs.bp1**, should be merged into any model which is to be used as a source for an Arena 4.0 model.

The sample models are:

ArenaOrderEntry40.bp1:

Diagram “**Credit Verification**” uses non-standard shapes that emulate those in Arena.

IDEF3 alternate diagram, “**WORST CASE CREDIT**” is the same diagram in IDEF3 notation.

Either diagram may be exported to Arena (via File|Export|Arena).

ACME Medical Equipment 40.bp1:

This model contains two versions of a single decomposition diagram. These diagrams illustrate the definition and use (instances on named grey dashed arrows) of resources.

Diagram “**ACME Medical Equipment**” is in IDEF3 notation.

IDEF3 alternate diagram, “**ACME Medical Equipt.**” uses non-standard shapes.

Either diagram may be exported to Arena (via File|Export|Arena).
